

Pulse Crop Genetic Improvement Network
PCGIN Stakeholder's meeting, PGRO 29th September 2006
Agenda:

The objective of the meeting is threefold:

1. To inform participants of activities and progress and invite comment.
2. To seek guidance on future directions.
3. To identify missing activities.

Active participation and debate is welcome. The meeting will include a display of plant material, illustrating sources of novel and desirable genes.

10:30 Arrival and coffee

First Session, Chair: Geoffrey Gent (PGRO)

11:00 - 11:30 Claire Domoney (JIC):
Introduction to PCGIN and summary of progress to date

11:40 - 12:00 Professor Julian Wiseman (University of Nottingham):
Seed quality for animal feed with reference to poultry.

12:10 - 12:40 Noel Ellis (JIC):
Towards genetic markers for agronomically relevant traits

12:50 - 13:30 Break for lunch and general discussions

Chair: Jane Thomas (NIAB)

13:30 - 13:50 Frédéric Muel (UNIP):
Bruchids: the French experience

14:00 - 15:00 General discussion I, Chair: Mike Ambrose (JIC):

- Vining and marrowfat pea quality – opportunities for metabolite profiling
- Seed bleaching
- Novel uses for pulse crops
- Issues remaining from the presentations
- *Vicia faba* and PCGIN

15:00 - 15:20 Break with opportunity for viewing poster and plant display

15:20 - 16:20 General discussion II, Chair: Jane Thomas (NIAB) or Noel Ellis (JIC)
Future plans and opportunities for LINK projects

16:20 - 16:30 Concluding Comments and Departures
